

2021

PRESS KIT

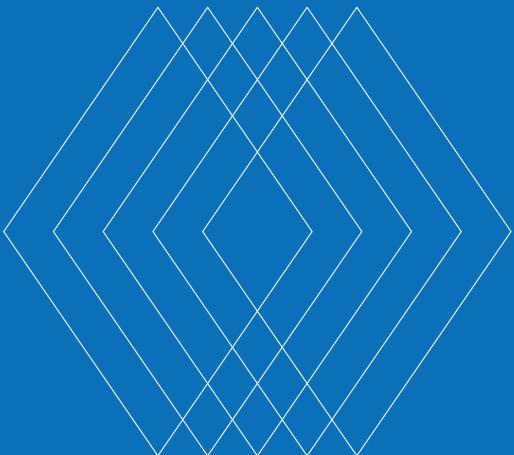

Mass is a brand new company that presents fresh and innovative solutions for web and digital applications

solutions that matter

Mass was funded in 2021, as part of LGP (Laboratório de Gestão de Projetos), a curricular unit that mix multiples master courses in FEUP (Faculdade de Engenharia da Universidade do Porto) and FBAUP (Faculdade de Belas Artes da Universidade do Porto).

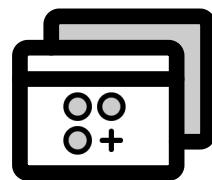

mission

To change how users interact with technology by creating tailor-made solutions aligned with our client's goals.

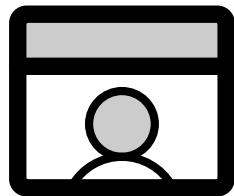

vision

To create fresh and innovative solutions for our customers, helping them to excel within their industries.

eFeupinho / iBuddy

FEUP-DEI/iPoint

eFeupinho (iBuddy in the english version) is a platform intended to help students better integrate themselves in the FEUP community, by bringing to them information that they may need.

The product will assist these students in three aspects: social and cultural integration; geographical integration; and academic and pedagogical integration.

Bem Esta

O Bem-estar Individual está relacionado com os pensamentos e comportamentos que tens contigo e com os outros. Este bem-estar permite que explores os teus sentimentos, sejam eles positivos ou negativos, e apoia-te para que possas lidar com mudanças na tua vida e com momentos difíceis de adaptação, exclusão ou mesmo de violência.

Esta dimensão apoia-te no encontro contigo e na amplitude e capacidade de te conheceres a ti para que possas compreender e aceitar o outro.

O Bem-estar individual libera-te de preconceitos e julgamentos e permite-te aceitar situações adversas, reconhecendo bem os teus limites.

Formas de melhorar o bem-estar individual incluem:

- Conhecer a própria cultura
- Reconhecer a diversidade
- Rejeitar a discriminação
- Prefeir a violência
- Procurar apoio sempre que necessário

Pessoal Saúde Conforto Psicologia

A abordagem intercultural juntamente com o bem-estar holístico reconhecem a complexidade que existe em cada um dos estudantes.

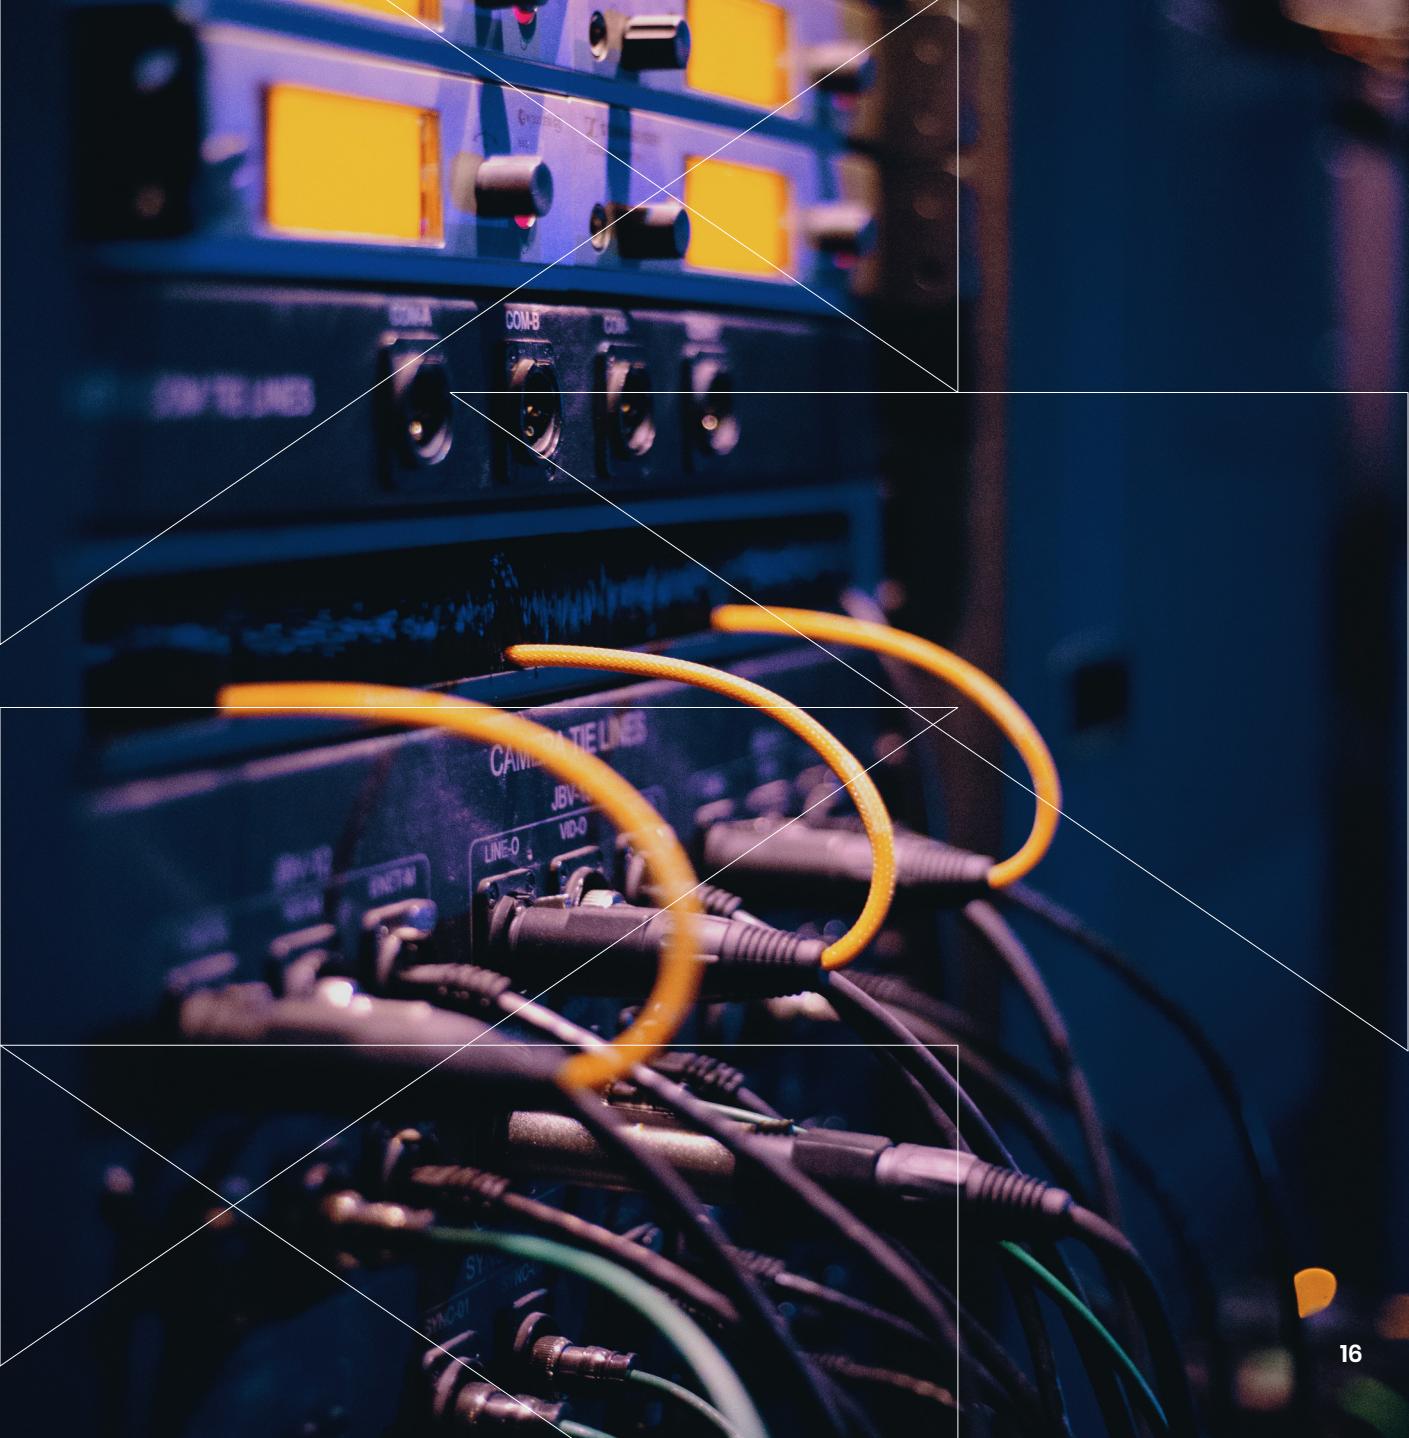

Quando sentes estranheza, estar em Portugal a estudar, pode ser um desafio interessante, mas pode também implicar um grau de pressão grande.

Com a nossa abordagem mais

signalcheck

EFACEC

Signalcheck aims to help during the process of creating systems for command and control of smart grids (SCADA). EFACEC's engineers spend considerable time performing validations of their work, some of which can be automated. The objective of this project is to specify and develop a specific set of tools that will optimize and automate the process of testing their systems.
